

**Leaders in Critical Electrical
& Mechanical Services**

**Generator & Electric Motor Sales, Service
& Installations; & Condition Monitoring**

INDUSTRY LEADERS IN CRITICAL ELECTRICAL & MECHANICAL SERVICES

OVER 20 YEARS PROVIDING QUALITY FOCUSED SERVICE

ABOUT KENSHAW

We understand that consistent power supply and generation is critical for your business and provide reliable specialist services in the areas of electric motors, generators and non-destructive testing (NDT).

From our head office in Newcastle we provide regular and responsive service to long standing clients within the data centre, agriculture, mining, industrial, hospitals, retirement villages, transport and utility sectors across the eastern seaboard.

Kenshaw's success has been built on our highly skilled, experienced and dedicated staff providing quality critical asset management services based on our simple philosophy: to provide professional service excellence with integrity.

As a result of our rigorous quality management practices, in 2013 Kenshaw attained ISO9001 accreditation.

OUR SERVICES

We provide a wide range of 'business critical' power generation solutions, products and services, across the entire life-cycle including electric motors, generators, mechanical equipment and non destructive testing services. From the initial sourcing and customisation of the right choice of motors and generators, to their installation and regular servicing, to testing the equipment to ensure that it is performing optimally and that any issues are identified ahead of time.

Partnering with several leading UPS providers, we also offer fully integrated UPS design, sales and installation.

Quality
ISO 9001
SAI GLOBAL

Leading providers of critical electrical & mechanical services to clients within the data centre, agriculture, mining, industrial, hospitals, retirement villages, transport and utility sectors.

MOTOR SALES & WORKSHOP

Kenshaw is one of the largest stockists of electrical motors in NSW outside of Sydney, able to source all brands of electric motors.

Turn-key Sales & Installation

We provide a comprehensive motor turn-key sales service for a wide range of electric motors starting from 0.18kw up to and including 150kW.

Electric Motor Workshop & Repair

We have a team capable of providing an agreed service response time 24 hours a day, 7 days week. Our fleet of vehicles ranges from fully equipped utility vehicles up to 7 tonne trucks.

What We Supply:

- Single & Three Phase Electric Motors
- Gearboxes
- DC & HVAC Motors
- Electro-Magnetic & Thruster Brakes
- Motor Start & Motor Run Capacitors
- DOL Starters
- Fans
- Coil Rewinds
- Slide Rails
- Soft Starters
- Vacuum Pumps/Blowers
- Variable Speed Drives

GENERATORS SALES & SERVICE

Kenshaw is a leading power generation solutions provider and dealer of generators and alternators across most major brands both new and used. Our services include generator systems design, turn-key sales, installation and all aspects of servicing including emergency breakdown, across all industries and market sectors.

Design, Turn-key Sales & Installation

We provide full turn-key solutions to help you meet your prime power and stand-by power needs. Our fully qualified and experienced team provide design, supply, installation and maintenance services, to regulated Australian Standards and compliance with MDG15.

Depending on our clients requirements, we offer customised solutions from standard manufactured units to specifically designed equipment.

Servicing & Emergency Breakdown

Critical power equipment requires critical care. Kenshaw provides a comprehensive after sales service programme, ensuring that your generators are maintained by qualified and experienced staff, offering you peace of mind.

What We Provide:

- Prime and Standby generators, single and three phase 1kVA through to 5000kVA
- Temporary and emergency generators for long or short term rental hire periods

- Design and supply of canopies and sound attenuation including different levels of sound and storm/ cyclone proofing
- Integration with a generator control system

NDT CONDITION MONITORING

To improve your plant efficiency, reliability and avoid unscheduled downtime resulting in production losses we also leverage a wholly owned subsidiary of Kenshaw; NDT Services Group (NDT).

NDT Services Group has major clients in steel, cement, pulp and paper, mining, water, power generation, aluminium, materials handling, defence, local government, chemical, automotive, forestry, food / beverage and construction industries.

What We Provide:

NDT provides a full range of testing and condition monitoring services, including:

- Motor Testing
- Oil & Vibration Analysis
- Thermal Imaging
- Laser Alignment
- Dynamic Balancing
- Ultrasonic Testing

We listen to your needs so we can pro-actively provide critical electro-mechanical solutions and services that exceed your expectations and ensure you are never let down.

QUALITY & SAFETY

Kenshaw is committed to quality management and safety to ensure the well being, health and safety of our personnel and valued clients. We also believe that impeccable safety is a good indicator of the quality of a business as well as the attitude of its staff. As such, Work, Health, Safety and Environment (WHSE) practices are always considered in our decision-making process, business practices and daily activities.

To achieve this aim, we have established a rigorous quality management system and as a result, in 2013 were given ISO9001 accreditation. In addition to this we have a detailed WHSE system based on industry and best practice requirements.

SUMMARY

Kenshaw provides a wide range of 'business critical' power generation solutions, products and services, across the entire life-cycle including electric motors, generators, mechanical equipment and non destructive testing services.

From our head office in Newcastle we provide regular and responsive service to long standing clients within the data centre, agriculture, mining, industrial, hospitals, retirement villages, transport and utility sectors across the eastern seaboard.
