Leaders in Critical Electrical & Mechanical Services:
Generator & Electric Motor Sales, Service & Installations
Kenshaw.com.au

SECTION 1 – KENSHAW ELECTRICAL PTY LTD

1.1 Company Overview

Kenshaw Electrical Pty Ltd (Kenshaw Electrical) provides electrical and mechanical services in the areas of:

- Electric Motor Rewinds and Overhauls (AS 4307)
- Overhaul and Repair of Hazardous Area Motors (AS/NZS 3800)
- New Electric Motors, Motor Audits & Motor Management System (MMS)
- Generator Sales, Installations, Repairs and Upgrades (AS/NZS 3007, AS/NZS 3000, AS/NZS 4871)
- Generator Preventative Maintenance and Servicing
- Electrical and Mechanical Testing Services

We predominantly serve the mining, power generation, telecommunications, commercial, health, industry, infrastructure and emergency services industries.

From our head office established in Newcastle during the year 1990 Kenshaw Electrical provides regular service to clients throughout Australia. Our success is due to highly-skilled and dedicated staff, quality workmanship and ongoing apprentice training programs, which ensure that we have a strong and growing, team of highly-skilled tradespeople operating on our simple philosophy: to provide professional excellence with integrity.

Electric Motors

1.2 Partnership Approach

We prefer to take a long-term partnership approach with our clients, often committing to long-term/multi-year maintenance contracts where possible, aligning our goals with the goals of our clients. We seek to build a relationship of trust with our clients.

1.3 Our Commitment

- We will manage our business in a socially responsible manner
- We will provide excellence in health, safety and environmental performance on all client sites
- We will provide optimal performance and accountability
- We will maintain detailed occupational health and safety policies and quality assurance systems
- We will work towards a goal of zero harm to employees, contractors and any other dangerous on-site activity.

Generators

1.4 Product and Service Capability

Kenshaw Electrical provides a wide range of services across the lifecycle of electrical and mechanical equipment.

Kenshaw Electrical Pty Ltd.'s electrical and mechanical service lifecycle

From initial sourcing and customisation of the right motors and generators, to their installation and regular servicing, to testing the equipment to ensure that it is performing optimally and any issues are identified ahead of time, to 24/7 repair work on site or in our fully equipped workshops, Kenshaw Electrical Pty Ltd can deliver effective products and services at reasonable prices.

1.5 Clients

- ARTC
- Delta Electricity
- Hunter Water
- HNELHD
- Nestle
- John Holland
- Graincorp
- OneSteel
- PWCS
- Caps Australia
- Molycop
- Ramsey Health
- Thiess
- AGL Macquarie
- Broadspectrum
- Glencore
- Boral
- Rio Tinto
- NCIG
- Hanson

1.6 Kenshaw Electrical Key Personnel

- Adam Malcolm - General Manager
- Ian McInnes – Reliability and Assets Manager
- Sam Breden – Business Unit Manager – Generator Sales and Service
- Grant Bayford - Project Supervisor
- Mitchell Centorrino - Generator Services Coordinator
- Todd Masson – Business Unit Manager – Workshop Overhauls
- Adam Burns – Branch Manager - ACT
- Barry Brosi - Product Sales & IT Manager

1.7 Work, Health, Safety and Environment (WHSE)

ISO 45001:2018 Current Accreditation 2021-2024
 ISO 14001:2015 Current Accreditation 2022-2025

WHSE practices are core to everything we do at Kenshaw Electrical Pty Ltd. We value the health and safety of our personnel above all else. We also believe that safety is a good indicator of the quality of the management and operations of a business, as well as the attitude of its staff. As such, WHSE practices are always considered in our decision-making process, business practices and daily activities.

We are committed to a healthy and safe workplace as well as continuous improvement. We are committed to:

- complying with all legal requirements and regulations, standards and codes of practice applicable to our operations
- applying and continually improving our health & safety management systems
- Identifying, registering, assessing and controlling hazards with a systematic approach
- Developing objectives and programs to achieve them
- Informing, training and maintaining the competencies of our employees
- providing and maintaining safe systems of work, keeping workplaces in safe, healthy and tidy conditions
- consulting and engaging our employees and contractors, promoting leadership and teamwork
- conducting internal and external audits of the operations, policies and safety management systems, and developing corrective actions for any gaps identified.

Kenshaw Electrical integrated management is accountable for the implementation and review of this policy and its commitments. We make safety a core condition of employment and unsafe behaviours are not tolerated.

1.8 Core Safety Values

Safety First to Last, no Compromise

These values are core to Kenshaw Electrical; they are not negotiable and underpin our daily work life. Everyone at Kenshaw Electrical is committed to adhering to these values for not only themselves and colleagues, but also to any other sub-contractor we may use or anyone that comes onto one of our worksites.

- **Fit for Work**
Never attend work under the influence of drugs, alcohol or fatigue
- **Mechanical Lifting/Suspended Loads**
I will never place myself or others under a suspended load
- **Electrical Energy**
I will not work on live electrical circuits unless authorised and trained
- **Isolation**
I will always isolate and verify wherever the chance of energy release is possible
- **Working with Hands & Hand Tools**
I will exercise care whenever working with my hands
- **Working at Height**
I will not work above 1.8m without fall arrest equipment
- **Manual Handling**
I will find a solution that prevents injury
- **Motor Vehicles | Plant & Equipment**
I will always obey all road and site specific rules when operating motor vehicles, plant and equipment.
- **Risk Assessment**
I will assess the risks and hazards before starting any job to ensure adequate controls are put in place to prevent injury and /or negative impacts to the environment.
- **Reporting**
I will report any safety and / or environmental incident via the correct channels and ensure that it is followed through to completion.

1.9 Quality Assurance

ISO 9001:2015 Current Accreditation 2021-2024

Kenshaw Electrical provide specialised services catering for Coal Mines and Coal Handling Preparation Plants, Gravel Quarries, Mineral Processing Industries, Schools, Defence Industries, Water Industries, Engineering Enterprises, Process Control Operations and smaller manufacturing and commercial enterprises.

We are committed to comply with requirements and to continually improve the effectiveness of the management system to ensure sustained profitable growth.

To achieve this aim we have established an integrated management system that is based on the requirements of ISO 9001, ISO 45001 and AS/NZS ISO 14001.

In 2013 as a result of Kenshaw's established and rigorous quality management system Kenshaw Electrical were given its original accreditation to ISO9001.

SECTION 2 – ELECTRIC MOTORS

2.0 Overview

Kenshaw Electrical was originally formed to provide service rather than product sales. However, from the very beginning of our business, many of our clients wanted more than just services. Kenshaw Electrical developed our sourcing and installation capabilities in response to that customer demand.

We now have almost 20 years' experience sourcing the right motors, generators and electrical and mechanical equipment for our clients. We stock a large range of motors, generators and related equipment in-house, and can quickly source products from a range of providers at attractive prices.

You can be sure, that in addition to being able to remove the old, install the new, service, test and repair your equipment, we stand behind the equipment we source.

2.1 Electric Motors & related equipment

Kenshaw Electrical is one of the largest stockists of electrical motors in NSW outside of Sydney. We are proud to be an agent of WEG and authorised distributor of TECO, FASCO electric motors and Bonfiglioli Gearboxes.

At our Cardiff warehouse, we stock electric motors starting from 0.18kw up to and including 250kW. In addition to our electric motor stocks, we carry TECO contactors and overloads, DOL starters, variable-frequency drives (VFDs), and Invicta Vibrators.

We complement our stocks by being able to competitively source and supply products by a wide range of other manufacturers but not limited to: -

- | | | |
|------------------|-------------|---------------|
| ■ WEG | ■ Baldor | ■ Toshiba |
| ■ CMG | ■ Ebm Papst | ■ Torin |
| ■ Teco | ■ Cummins | ■ Leroy Somer |
| ■ Invicta | ■ Powerlite | ■ Bonfiglioli |
| ■ Lenze | ■ Mayr | ■ SEW |
| ■ Brook Crompton | ■ Lafert | ■ Pope |

Our products include:

- Three phase electric motors
- Single phase motors
- DC motors
- Motor controls
- Air movement motors and fans
- Brakes
- Geared motors and gearboxes

SECTION 3 – ELECTRICAL & MECHANICAL SERVICES

3.0 Core Competencies

Servicing electrical and mechanical equipment is the core of what we do at Kenshaw Electrical. We are deliberately multi-disciplinary — we seek to offer a very wide range of services to cater to a wide range of customer needs.

Most of our business is repeat business, with three quarters of our clients using our services more than once each year. However, we conduct work on a project basis as required.

Kenshaw Electrical has a team capable of providing agreed service response time **24 hours a day, 7 days' week**. We have a fleet of vehicles ranging from fully equipped utility vehicles up to 7 tonne trucks. Our team provides services that include:

Kenshaw offers their clients a one stop shop for all of your critical electrical and mechanical services.

Professional maintenance, service plans & procedures offering improved efficiencies & breakdown response times

Enhanced electrical / mechanical engineering and technical support capabilities offered 24/7

ELECTRICAL	MECHANICAL
■ Electric motor and Generator maintenance and breakdown services	■ Plant maintenance
■ Motor control and protection systems	■ Generator Installations
■ Engineering and Design	■ Gearbox repairs
■ (MMS) Motor Management System	■ (MMS) Motor Management System
■ Testing / Condition Monitoring	■ Testing
■ VF Drives	■ Dynamic Balancing
■ Emergency Power installations	■ Diesel Mechanics
■ UPS installation and maintenance	■ Laser Alignment

We also provide a full range of testing services, including vibration and oil analysis, thermal imaging, motor signature analysis and corrective actions such as laser alignment, onsite balancing, mechanical and electrical auditing all to improve your plant efficiency, reliability and avoid unscheduled downtime resulting in production losses.

3.1 Workshop

Kenshaw Electrical workshop is located in Cardiff (Newcastle) NSW. From this workshop, we are able to provide a huge range of products and service to our clients.

Repairs and modification options for AC & DC motors include: -

- Stator Rewinds including redesign
- Modify and upgrade motor to customer specifications
- Machining and modifications to shafts
- Modification for purpose built machines
- Supply and fit electric brakes AC/DC
- Tropic Proofing
- IP Rating Upgrades
- Rewinding armatures and repairing/replacing commutator
- Re-lamination and insulation of armature stacks
- Rebuilding/replacing of damaged brush holders
- Rewind slip ring rotors including lamination repair and rebuild
- Overhaul & repair of explosion protected electrical equipment for the following Protection Types: Ex d, Ex e (Group I and II) and Ex t (Group III).

3.2 Dynamic Balancing

Kenshaw Electrical offers dynamic balancing using Dyna Balance equipment. Dynamic Balancing up to 5.5 tonne – 2.7 metre diameter of:

- Rotors & Armatures
- Fans
- Impellers
- Machine Spindles
- Propeller Shafts
- Rollers

3.3 Testing Services

- AC & DC testing capability
- Load Testing up to 250Kw 4pole & 400Kw 2pole
- Core Loss Testing
- Surge & Hi-Pot testing
- Power Factor Correction (PFC)
- Thermal Imaging
- Grease Oil / Analysis
- Onsite Balancing

3.4 Accredited Service Provider (ASP) Level 2 - *Class 2A, 2B, 2C for Level 2 connections and services*

- Service Fuse Replacement
- Ceramic Barge Fuse Replacement
- Timber Block Replacement
- Private Pole Installation / Replacement
- Mains Connection Box (MCB) Repairs
- Point Of Attachment Repairs
- Overhead Service Repairs
- Ausgrid Defect Notice Repair
- Installation of Underground Service Mains up to 400A
- Upgrade of Existing Underground Service
- Underground to Overhead Connections (UGOH)
- Underground Connections up to 400A
- HV Capabilities

3.5 Other Services

- VPI – Vacuum Pressure Impregnation
- Gearboxes
- Eddy current drives
- Generators and generator welders
- MG sets
- Magnets
- Coils and Transformer Repairs
- Laser Alignment

Tailor made servicing and maintenance plans –
NSW Wide geographical service area: - 400+ sites
Metropolitan and rural region coverage plus
service in QLD, VIC and SA

SECTION 4 - GENERATORS

4.0 Overview

Kenshaw Electrical stocks many brands of generators both new and used. Our range includes single and three phases – Open and Sound attenuated units. We are also proud to be an authorised distributor and service agent of **Cummins Generators**.

Emergency power supplies or backup generators are our specialty. Our fully qualified staff can design, supply, install and maintain your generator system to Australian standards.

Kenshaw Electrical design systems to meet individual specifications. We offer standard manufactured units and specifically designed machines as required. Kenshaw also has a range of generators for long or short term rental periods.

Our team offers complete design to installation of generators from 1kVA through to 5000kVA, multi-unit projects and mechanical installations.

We can also offer an extensive range of used equipment where requested.

We complement our stocks by being able to competitively source and supply products by a wide range of other manufacturers but not limited to: -

- Kohler
- Cummins
- FG Wilson
- Pramac

4.1 Turn-key supply, build and maintain services

We provide high quality tailored supply, installation and maintenance services covering all aspects of the project from start to finish:

- Site inspection
- Customer requirement survey / audits
- Design
- Flexible site installation options – including load banks and bulk fuel facilities
- Accessories options
- Canopy Repairs
- MDG15 Generator Upgrades – DPI Standards
- Site delivery & installation
- Commissioning
- Maintenance and servicing programs
- Installation and Servicing of (UPS) Uninterrupted Power Supply Systems
